Domain. Formula. Manufacturing know-how.

The offer covers addtix.com and the knowledge for manufacturing the mineral composition: formula, mineral proportions, mixing ratios and production options.

What you take over.

addtix.com domain

The domain is transferred to you as part of the agreed purchase.

Manufacturing formula

You receive the existing recipe for the mineral product composition.

Mineral proportions & mixing ratios

The production knowledge covers the minerals used and their quantitative or percentage proportions.

Production options

You acquire knowledge of where and how the composition can be produced, in-house or with a suitable mineral mill or blending business.

Your benefit

The composition and mixing ratios form part of the manufacturing know-how. You can build on that formula instead of developing it again from the beginning. Use the production knowledge for your own facilities or discussions with a suitable mineral mill or blending business.

Next step

Speak with Veit Weise about your intended use and manufacturing. A non-binding indicative offer is also welcome.
